(54) Title: MOBILE AD-HOC INTERNET SHARING

(57) Abstract: A method and a system for mobile ad-hoc Internet sharing. The system comprises a first portable device (10) that is provided with wireless communication capability (11) and that is enabled to identify a user A of the device (10), a second device (20I;20II) that is provided with wireless communication capability (21I;21II) and with capability (22I;22II) to connect to the Internet via an ISP, and that is enabled to identify a user B responsible for the connection, and an ISP (30). The method comprises wirelessly sending information from the first device (10) to the second device (20I;20II), for initiating a connection between the first device (10) and the ISP (30), forwarding the information from the second device (20I;20II) to the ISP (30), identifying, at the ISP (30), that the information is sent from user B and originates from user A, and initiating, at the ISP (30), registration for charging of an account (36) of user A for said connection.
